On this day CALTRANS OSM Quality Assurance(QA) Inspector Mr.Shrikant Utekar was present during the times noted above for observations relative to the fabrication of the SAS Superstructure being performed by Zhenhua Port Machinery Company (ZPMC) at Changxing Island in Shanghai, China. The QA Inspector observed and/or found the following:

**BLAST SHOP 2, OBG 14W**

This QA Inspector performed Blast inspection on base metal, fillet welds and complete joint penetration (CJP) welds from panel point (PP) 125 to PP128.7 (cross beam side) and PP 126 to PP 128.7 (cable side) on internal surface of side panel, edge beam, floor beam and longitudinal diaphragm of OBG segment 14W. During inspection, several non conforming discontinuities such as weld spatter, deep gouges, arc strikes, incomplete welds and improper cope hole profile observed. These areas were marked up for repair. All information regarding this marked on weld map and submitted to Lead QA Inspector.

Unless otherwise noted, all work observed on this date appeared to generally comply with applicable contract documents.

**Summary of Conversations:**

No significant conversations were reported on this date.

**Comments**

This report is for the purpose of determining conformance with the contract documents and is not for the purpose of making repair or fit for purpose recommendations. Should you require recommendations concerning repairs or
